

CoSo Cloud's powerful integration between SAP SuccessFactors and Zoom provides a seamless experience for instructors, students and course administrators. Create, manage and launch courses via Zoom directly from SuccessFactors. Zoom's easy to use interface, combined with embedded functionality right inside SuccessFactors makes this the ideal solution for instructors to be able to quickly and easily launch high-quality virtual training sessions.

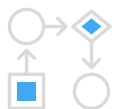

Instructors can feel confident that only enrolled students have access to the courses.

KEY BENEFITS

- ✓ Create, manage and launch Zoom meetings seamlessly from the familiar SAP SuccessFactors environment
- ✓ With Single Sign-On (SSO), instructors and students access classes through your regular SuccessFactors environment, avoiding the need to remember additional logins or passwords
- ✓ Customize work flows and features to meet your specific unique needs

KEY FEATURES

Streamlined Workflow

Instructors create and manage all courses directly from the SuccessFactors UI without the need to go back and forth between Zoom and the LMS to set up classes, as well as review and attendance reports. Additionally, for large organizations, instructors can see when time slots are available to avoid overlapping critical courses.

Attendance Reports

Analyze session attendance reports directly within SuccessFactors

About CoSo Cloud

CoSo Cloud is a global company based in Oakland, CA with office locations in San Diego, CA and the Washington DC metro area. CoSo provides a secure private cloud platform with customized managed and professional services to distributed businesses and government agencies engaged in high-consequence virtual training and communication of mission-critical information in real-time. CoSo also offers software applications and professional services to customize the virtual engagement environment for customer specific use cases when requirements demand more than a virtual meeting. CoSo is an authorized Adobe Connect® Gold partner and a leading eLearning services provider.
