CoSo Global Sync
Custom synchronization across your global deployment of Adobe Connect

The only multi-region solution for efficient, distributed, consistent Connect experiences

Leverage your investments in course templates, custom branding, and content creation by synchronizing these assets across your deployments

- Chose how assets are distribute, from single direction to bi-directional
- Improve user experience with rapid, local access to content
- Standardize meeting and virtual classroom tools and content using dynamically synchronized room templates
- Set permissions on distributed assets to manage global deployments with ease
- Change templates and content once, and allow Global Sync to roll out those changes to ensure global consistency
- Amplify the value of captured resources by distributing recordings to a global audience

What Can be Synchronized
- Room Templates
- Meetings
- Library of Content
- Folders
- Recordings
- Users
- Settings

PUSH MASTER ASSETS
Define master content sets and ensure they are pushed to global satellite locations to ensure consistency

NEW JERSEY
LONDON
HONG KONG

MULTI-DIRECTIONAL GLOBAL SYNC
Selectively synchronize content from multiple master sources, where regional locales own the latest version
