

CoSo Cloud's powerful Zoom LTI Integration for Canvas provides a seamless experience for instructors, students and course administrators. Create, manage and launch courses via Zoom directly from your Canvas environment. Zoom's easy to use UI, combined with the Canvas Zoom LTI integration makes this the ideal solution for instructors to be able to quickly and easily launch high-quality virtual training sessions.

In addition to hosting classes, our LTI service offers the unique ability for instructors to schedule recurring virtual office hours where students reserve time slots, then join directly via Canvas. Instructors can also schedule study groups or enable students to self-assign and host their own study group.

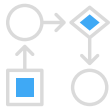

Instructors can feel confident that only enrolled students have access to the courses and content through secure roster management. Instructors and Course Administrators will save administrative time through management and creation of all classes, assignment, roles, recordings and reporting centrally from with Canvas.

## KEY BENEFITS

- ✓ Create, manage and launch Zoom meetings seamlessly directly from Schoology environment
- ✓ Save administrative time through automatic syncing of recordings to Canvas and your desired hosting location (Kaltura, Google Storage, etc.)
- ✓ Customize work flows and features to meet your specific unique needs.
- ✓ Schedule recurring office hours where students can reserve time slots directly via Canvas UI.
- ✓ With Single Sign-On, instructors and students access sessions via Schoology's UI, avoiding the need to remember additional logins or passwords
- ✓ Empower students to schedule and host individual study group sessions

# KEY FEATURES

## Streamlined Workflow

Instructors create and manage all courses directly from the Canvas UI without the need to go back and forth between Zoom and the LMS to set up classes, as well as review recording and attendance reports. Integrates directly with Canvas' calendar. Additionally, for large organizations, instructors can see when time slots are available to avoid overlapping critical courses.

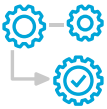

## Single Sign-On

Courses are accessed and launched from the Canvas environment with a single click of a button, launching Zoom seamlessly in the background, so students don't need to remember additional logins.

## Roster Security

Map your Canvas course roster to automatically create Zoom users and ensure only individuals registered in a course can access that session, as well as enable participant roles, video rights and audio settings directly from Canvas.

## Recording Management

Recordings are automatically uploaded to LMS for recording management and viewing, and saved to the storage location of choice, including Kaltura and Google Storage. With direct integration to Kaltura's Video Platform, users have the additional flexibility for video playlists to be displayed, renamed, or deleted from the LMS.

## Office Hours Scheduling

Allow instructors to efficiently host reoccurring office hours across multiple courses that students can reserve, pre-submit questions and automatically receive appointment notifications.

## Study Groups

Teachers can assign and manage assignments for virtual study groups or enable student to schedule and host.

## Attendance Reports

Analyze Zoom session attendance reports directly within Canvas. Download attendance reports in Excel or PDF and easily access valuable user metrics.

## About CoSo Cloud

CoSo Cloud is a global company based in Oakland, CA with office locations in San Diego, CA and the Washington DC metro area. CoSo provides a secure private cloud platform with customized managed and professional services to distributed businesses and government agencies engaged in high-consequence virtual training and communication of mission-critical information in real-time. CoSo also offers software applications and professional services to customize the virtual engagement environment for customer specific use cases when requirements demand more than a virtual meeting. CoSo is an authorized Adobe Connect® Gold partner and a leading eLearning services provider.
